
A
B
C
reverse
Sideways distance (axis lengths)
Progress toward young donor (axis lengths)
Progress toward aged donor (axis lengths)
closer than at start
start
target
Change in distance ÷ starting distance
Fraction of young cells in mixture
MD genes (205)
All genes (23,485)
random 3,089-gene sets (200)
target (young donor, day 0; reverse: aged donor)
Age genes (3,089)
random 205-gene sets (200)
start
closer than at start
