A
Offset between screen controls and late-passage cells
Activation screen, 20 components
Interference screen, 20 components
Activation screen, full gene space
Interference screen, full gene space
0.7
0.8
0.9
1.0
Offset, as a multiple of the passage gap
B
Direction of that offset
Activation screen, 20 components
Interference screen, 20 components
Activation screen, full gene space
Interference screen, full gene space
−0.3
−0.2
−0.1
0.0
0.1
Cosine with the passage direction
C
The four factors are among the largest groups
STAT3
EZH2
E2F3
ZFX
Perturbations (of 340)
0
20
40
60
0
50
100
150
200
Cells per perturbation (minimum 30)
D
Reference genes measured per dataset
Southard
20,264 measured; 10.0% of the donor-age difference unmeasured
Sengstack
16,781 measured; 22.0% of the donor-age difference unmeasured
Lu
20,452 measured; 9.0% of the donor-age difference unmeasured
0
10,000
20,000
Reference genes (of 23,485) measured
